Front End Engineer

Tangerang Selatan, Banten, Indonesia

As an Alterra Academy Front End graduate, I have done several projects using Javascript as my main programming language and framework/library such as ReactJS, NextJS, Tailwinds, Bootstrap and ChakraUI. Currently learning frameworks and languages such as Typescript, Next.JS, MySQL and Express.JS, I'm so eager to join your company and see what's next to learn.

PROJECT

Admin Dashboard

Dashboard Alta is an application to simplify Alta team in managing mentees, mentors, and classes which becomes one application portal by making this dashboard. This project contains consume API using Axios library, Dashboard using React.js, styling using DaisyUI and TailwindCSS, and was deployed in Netlify. See the source on [Github](#).

Hyrule Travel

The features that I cloned from Airbnb were to book the place, list places, and be a host where you can rent your property. I worked on the front end using Next.Js as the base of the project and Tailwind CSS as the framework for the CSS, and Node.js. Also deployed using Vercel. you can see the source code on [Github](#)

Ikuzports

Ikuzports is a website for sport lover to find a new friend to play together, user there can find an event with their desire sport and you can join a club too to play together within the same area or same kind of sport. Developed a new feature which enabled users to log in with google for easy access. See the source on [Github](#)

Akarashi

Akarashi is a dynamic website built with React.js, TypeScript, Tailwind CSS, and Redux, offering a user-friendly platform for accessing comprehensive video game information. With its sleek design and responsive interface, Akarashi allows users to easily browse and search for games, providing detailed descriptions, ratings, and release dates. Its integration with Redux ensures efficient data management and seamless real-time updates [Github](#)
